# A Comprehensive Line-up of Multi-functional High Resolution Cameras Solves a Variety of Surveillance Needs 

PAN-FOCUS $\begin{aligned} & \text { Pan-focus lens can bring a broad area into } \\ & \text { focus, enababing the camera system to }\end{aligned}$ visualize everything in the field of view clearly at the same time. The lens also has a $2.6 \times$ zooming function. As a result, it allows a surveillance camera to capture a clear video image offering details of background objects.

## 520 <br> TV Lines

 Horizontal resolution The SANYO camera delivers 520 TV lines.The DSP (Digital Signal Processor) with a proprietary algorithm produces sharp outlines and natural color with no color smudges.

## DAY NIGHT

 24-hour surveillance is now possible with just a single camera that works as a color camera during the day and a high-sensitivity $\mathrm{B} / \mathrm{W}$ camera during the night. The mode of operation is automatically switched by replacing the optical filter. The use of an optical filter in the color mode also allows video recording in true colors.
## Minimum illumination <br> 0.03 lx

## Minimum subject illumination

The minimum illumination required for recognizing a subject is generally 2 to 6 lx for color cameras, and 0.03 lx for $\mathrm{B} / \mathrm{W}$ cameras. Minimum subject illumination changes according to the $F$ value of combined lenses. When F1.2 lenses and F1.4 lenses are combined with an F1.2 lens, minimum subject illumination is reduced, making monitoring possible in dark locations.

## 

Backlight compensation
ways or windows where the backlighting causes the subject to appear as a silhouette, this function automatically adjusts to the most appropriate aperture.

SANYO CCD cameras use four systems: center-zone photometry system, 5-section photometry mode setting, multi-spot photometry (48 / 64 -section) systems and multi-spot masking.
With the center-zone photometry system, the brightness of the light measuring area is measured, and by automatic adjustment of the lens aperture, a clear and sharp image is possible even when the subject is

## backlit.

With this system, the light measuring area is in the center of the screen for an optimal image of the subject.

## With the 5 -section

photometry system, the screen is divided into 5 sections to which the user

An example of weight setting: Top $=1$, Bottom $=5$, Left $=10$, Right = $=10$, Center (fixed) $=15$, Right $=10$, Center (fixed) $=$
The size and position of the The size and position of the
Center area is adjustable.
will assign 15 -scale weights. The brightness of the picture will be kept at optimum by giving priority to the area with the higher weight. (A DC type auto-iris lens is required to enable this mode.)
With the multi-spot photometry (48/64-section) system, the screen is divided into 48 / 64 areas on which luminous intensity is measured separately to determine the lighting/backlight conditions of all objects.
This makes it possible to apply optimum backlight compensation even for peripheral and moving objects.
With the multi-spot masking (48-sections) system, certain areas can be eliminated from the photometric measurement using a 48-section grid. The light intensity for the remaining area is measured and the image brightness is adjusted

Areas in which illuminance will not be measured accordingly.

AWC

White-balance (color cameras only)
Sometimes the color of clothes seen under lighting inside a shop appears different when viewed in sunlight outside. This is due to variation in the color temperature of the light source. The human eye is highly adaptable to variation in the color temperature of light sources so that even when the light source changes, white appears as white. But CCD adaptability is poor, and to reproduce unbalanced white when the light source changes, correction of the image signal is necessary. All SANYO color CCD cameras have TTL (Through The Lens) auto tracing white-balance, so even in a location with significant variation in color temperature of the light sources, such as next to a window, the image is automatically adjusted accordingly to achieve the best color.

## Internal sync. External sync. <br> External sync Line lock

## Synchronizing system

This is the timing used by the security camera when filming (synchronizing). There are sync systems that synchronize with the internal sync signal circuit (internal sync.), or that synchronize with a sync signal input to the security camera from outside (external sync.), or those that use the cycle of the camera's AC power to synchronize (line lock). When switching between several security cameras for surveillance using one monitor, synchronizing the cameras is necessary. For this, the line lock and external sync systems are used.

SSP

## SSP (RS-485) compatible

By using SSP (SANYO Security Serial Protocol), cameras and DVRs can be controlled with just one controller over a daisy chain connection up to a maximum of 254 devices. The maximum cable length (total length of the daisy chain path) is 1200 m (4000 feet).

| $\begin{array}{c}\text { Electronic } \\ \text { iris }\end{array}$ |
| :---: |

$\qquad$ Iris

The aperture that is adjusted to control the amount of light entering the lens depending on the lighting conditions. If the lighting is consistent, a fixed exposure is used; if the lighting fluctuates, autoexposure uses is used.

## 220 V to <br> $\qquad$

Power Sources
The power sources for driving the camera.

1/4" Color CCD High-resolution
AF Speed Dome Camera
VCC-9800P series

High-speed Panning of $435^{\circ} / \mathrm{sec}$
The camera makes it possible to capture the image of exact point of surveillance with high-speed panning of $435^{\circ} / \mathrm{sec}$ between preset positions. This accurate mechanism is capable of capturing quickly moving objects and objects approaching the camera when it is zoomed in.

| Pan / Tilt speed | Pan | Max. $435 \%$ sec. |
| :--- | :--- | :--- |
|  | Tilt | Max. $400 \%$ sec. |
|  | Manual pan /tilt | 0.1 to $120^{\circ} /$ sec. |

Preset Accuracy to $\pm \mathbf{0 . 0 1 4}$ (typical) of a Degree In the case of a speed dome camera, the motorized drive's performance is vital in order to capture numerous points of surveillance during lens movement and zoom-ratio changes. SANYO's new series of speed dome cameras keeps the accuracy of the camera's return to preset points to within 0.014 (typical) of a degree for precision capture of images from surveillance.

Designated point set using preset position function

Image from conventional camera* with error margin ${ }^{\text {as }}$ *VCC large as $0.2^{\circ}$

BARBER SHOP WILDROOTミ

Error margin of designated point is a mere $0.014^{\circ}$ point is a
(typical)

Vibration Compensation (VCC-9800P / VCC-9700P) Blurs due to vibration of the camera can be electronically removed. It is also possible to correct blurs only, while continuing the camera movement such as pan and tilt.

Automatic Tracing (VCC-9800P / VCC-9700P)
The camera comes with an image processing algorithm that is capable of detecting moving objects on the screen and tracing an object automatically. When there are multiple movements, an object with the biggest move will be traced. Further settings are available according to the pattern of movement.

1/4" Color CCD High-resolution
AF Speed Dome Camera
VCC-9700P series

Optimum Auto Focus
Further development of conventional auto-focus functions has resulted in not only shorter focus times, but also the added capability of remaining clearly focused on a targeted subject in front of the camera, even when other elements are passing in and out of the field of view. And with optimum focus, images remain in focus, even when the lens is in motion during pan/tilt operation.

Maximum 576x Zoom Function 36x Optical Zoom and 16x Digital Zoom (VCC-9800P / VCC-9700P)
The 36x optical zoom and 16x digital zoom can be combined for a close-up of 576x. This allows even distant subjects to be checked in detail, allowing one camera to monitor a wide area.

Up to 256 Preset Positions (VCC-9800P / VCC-9700P) The user can set up to 256 preset positions with VCC-9800P / VCC-9700P and up to 128 preset positions with VCC-9600P / VCC-9500P. Preset positions can be set to any angle from directly below the camera to the horizontal position, facing any direction in the adjustable range of the lens, to offer the capability to capture the image of any surveillance area. When manually operated, the lens can be moved at the speed of $0.1 \% \mathrm{sec}$ to $120 \% \mathrm{sec}$ for accurate tracking of moving objects.

Four Types of Auto Mode Setting Sequence, Tour, Auto Pan and Auto return modes are available.

Upward Surveillance Enabled PTZ Operation
In addition to endless $360 \%$ sec panning, the camera's lens section enables $185^{\circ} / \mathrm{sec}$ tilting in the vertical plane for an area of surveillance expanded by $5^{\circ}$ (indoor applications only) compared to previous models.

No dead areas with new speed dome cameras

Image from conventional
camera* at $0^{\circ}$ tilt *VCC-9400P / 9300P cameras

Upward tilt to $5^{\circ}$ past zero for an expanded area of surveillance with VCC-9800P / 9700P 9600P / 9500P cameras

Available in Three Forms, Outdoor Type, Surface Type or In ceiling Type
The camera is available in three different styles. Assemble them with different fittings and covers to make a camera most suitable for your surveillance needs.

## All around Privacy Masking

When there is a house, or even a window, within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other people's privacy. Up to 24 rectangular masks of arbitrary size (rectangle) can be set.

## Coaxial Control or RS-485

Coaxial control: SSP / H-SSP / PELCO-C
RS-485: SSP / H-SSP / PELCO-D
*Other protocols are now under development.

## SSP (RS-485) Compatible

By using SSP (SANYO Security Serial Protocol), cameras and DVRs can be controlled with just one controller over a daisy chain connection up to a maximum of 254 devices. The maximum cable length (total length of the daisy chain path) is 1200 m (4000 feet).

## 1/4" Color CCD High-resolution

 AF Speed Dome Camera
## VCC-9500P series

Camera Control Unit VAC-70 (sold separately)
Remote set-up provides users with the feeling that they have the camera right beside their monitor. Capable of setting up VCC-9800P / VCC-9700P / VCC-9600P / VCC-9500P for all onscreen menu items (intelligent digital motion detector, backlight compensation, white-balance, etc.)
*See page 33 for details.
Easy-to-Manage Installation, Setup and Adjustment Enclosed within the housing are an integrated lens, a motor and a pan/tilt mechanism. Attachment to the power supply base by simply sliding the release levers simplifies installation at the point of surveillance. The settings circuit board is detachable for access to protocol, address and other switch settings.

Detachable without
disconnecting power cable

Slide the camera unit's two release levers and lock the power supply base into position. No special tools required for camera unit installation or removal.

Detachable Settings Circuit Board

## Communication

JPEG Network board VA-80LAN
(sold separately)
JPEG/H. 264 Network board VA-82LAN confinuicicit (sold separately) See page 20 for details. Coming soon
This expansion board for network connection enables SANYO VCC-9800P / VCC-9700P / VCC-9600P / VCC-9500P to connect to a network. The user can operate a network connected camera using a web browser (Internet Explorer) It comes with the VA-SW3050LITE viewer software.

Network Recorder VA-SW3050
(sold separately) See page 20 for details.

## Applications

## Available in Three Different Packages

Outdoor, Surface, or In-ceiling - Select a combination that matches your needs!
The combination of camera units and options allows the user to create tailor-made solutions. It also simplifies the installation.

2.6x
Optical Zoom

(AAudio)
Communication

| Minimum <br> illumination <br> $0.06 \quad 1 \mathrm{x}$ |
| :--- |
| Alarm IN x 2 <br> Alarm OUT x 1 |

SANYO proposes the 2.6x pan-focus lens to
offer a focused view of a broader area
With a vari-focal lens, objects that are in front of or behind the focus point are blurred. To eliminate this problem, a new technology was developed to increase the depth of field so that everything in the field of view is in focus at the same time. SANYO has been one of the leaders in the development of this technology and has successfully commercialized the
$2.6 x$ pan-focus lens that offers an image with greater depth of field. The new lens makes it possible to capture a clear image of objects in the background.

Privacy Masking (Up to 8 Masks)
When there is a house or even an object as small as a window within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other people's privacy. Up to 8 rectangular masks of arbitrary size can be set. These masking areas may be protected with a four-digit (max.) password.

## PTZ Operations over a Network

Both VDC-DPN9585P and VCC-PN9575P come with a PT mechanism and allow panning of 335 degrees ( 55 degrees*) and tilting of 90 degrees ( 90 degrees*) to reduce blind spots in the surveillance area. When particular angles are preset on the camera (up to sixteen points), it moves to each position quickly at the speed of $120 \% \mathrm{sec}$ max. for both panning and tilting. Combining these features with the motion detector, it is possible to catch all actions taking place in the area.

* For wall-mounted cameras

Flexible Motion Detector
The Flexible Motion Detector enables reliable and accurate motion detection by analyzing the magnitude of movement and the size of object from changes in picture brightness. When a moving object is detected, VDC-DPN9585P / VCC-PN9575P can send an alarm signal to external units and/or switch to the optical zoom mode that can be preset either to $1.0 \mathrm{x}, 1.4 \mathrm{x}, 2.0 \mathrm{x}$, or 2.6 x zoom.

SANYO Security Systems for the Creation of a Full-fledged LAN or Internet Video captured by camera can be viewed using the bundled VA-SW3050LITE viewer software. Use of the VA-SW3050 archiving software (sold separately) allows simultaneous monitoring of streams from up to 128 cameras as well as recording of live audio and video data.
*Use of the VDC-DPN9585P's or the VCC-PN9575P's built-in networking features allows viewing of video from a single camera with a generic web browser (Internet Explorer).

## Power-over-Ethernet (PoE)

Both VDC-DPN9585P and VCC-PN9575P support the IEEE 802.3af standard for Power-over-Ethernet (PoE) applications to allow power supplied over LAN cabling. In addition to making installation easier, this allows camera installation in places where it would otherwise be difficult to secure a power source.

Surveillance-Point Monitoring with Video and Audio Data The VDC-DPN9585P and VCC-PN9575P are equipped to enable two-way voice communications via audio signals sent between cameras and PCs. Transmission of crystal clear images together with audio offers those overseeing surveillance as a sense of being right there at the scene.

Easy Setup with an On-screen Menu
The VDC-DPN9585P and VCC-PN9575P offers an on-screen menu for setting up the camera any desired way.

Operation on PoE, AC or DC Power Sources
The VDC-DPN9585P and VCC-PN9575P can operate on PoE, 12 V DC ( 12 V to 15 V DC ) or 24 V AC ( 60 Hz , and even at a tolerance of $\pm 10 \%)$. Switching to the correct mode occurs automatically when power is supplied.

| MODEL | VDC-DPN9585P |
| Image compression | JPEG |
| Resolution | $720 \times 286,640 \times 480$ (disabled during voice communications), $360 \times 286,180 \times 143$ |
| Picture quality | 5 levels |
| Frame rate | Max. 25 IPS (720 x 240) |
| Audio compression method | G. 711 (192 Kbps), full duplex |
| Input | -62 to -32 dB (monaural microphone) 3.5 mm mini jack |
| Microphone External |  |
| Internal | Internal or external selected |
| Audio output | LINE OUT monaural audio output, maximum -8 dB, 3.5mm mini jack |
| Bandwidth | $128,256,512 \mathrm{Kbps}, 1,2,3,4 \mathrm{Mbps}$, no limitation |
| Alarm buffer | Up to 8 MB ; configurable |
| Interface | 10BASE-T / 100BASE-TX (RJ-45 connector) |
| PoE support | Compliant with IEEE 802.3af |
| Protocols | TCP, UDP, HTTP, HTTPS, SMTP, NTP, DHCP, FTP, UPnP |
| Simultaneous access capacity | Image: Maximum 16, Voice: Maximum 16 (admin: 1) |
| Security | BASIC authentication (ID/password), SSL supported (image only) |
| Bundled software | VA-SW3050LITE |

## Heater board VA-50H

(sold separately) for VDC-DPN9585P
The heater board protects the camera from cold weather. It allows the camera to operate at temperatures as low as $-30^{\circ} \mathrm{C}$. ( 24 V AC only)

## Smoked Cover VCZ-50

(sold separately)
for VCC-PN9575P

Half-Mirror Cover VCZ-51
(sold separately)
for VCC-PN9575P
(sold separately)
See page 33 for details.

## Camera Control Unit VAC-70

Network Recorder VA-SW3050
(sold separately)
See page 20 for details.

# By adopting New Technology, SANYO has Developed a Pan-focus Iens camera which offers better functionality with a clearer image for a broader area. 

## SANYO proposes the 2.6x pan-focus lens to offer a focused view of a broader area

With a vari-focal lens, objects that are in front of or behind the focus point are blurred. To eliminate this problem, a new technology was developed to increase the depth of field so that everything in the field of view is in focus at the same time. SANYO has been one of the leaders in the development of this technology and has successfully commercialized the 2.6x pan-focus lens that offers an image with greater depth of field. The new lens makes it possible to capture a clear image of objects in the background.

Image with a pan-focus lens

- Clear focusing on all shooting area with great depth of field (D.O.F.)
- No focus adjustments
- Remote zoom adjustment by camera control unit, VAC-70

Image with a vari-focal lens

- Clear focusing to a specific area
- Manual focus adjustments
- Manual view angle adjustments

## 1/4" Color CCD High-resolution <br> Vandal-resistant PT Dome Camera <br> VDC-DP9585P

PAN-F©CUS
DAY NIGHT

Optical Zoom

## PTZ Operations

VDC-DP9585P comes with a PT mechanism and allow panning of 335 degrees ( 55 degrees*) and tilting of 90 degrees ( 90 degrees*) to reduce blind spots in the surveillance area. When particular angles are preset on the camera (up to sixteen points), it moves to each position quickly at the speed of $120 \mathrm{deg} / \mathrm{sec}$ max. for both panning and tilting. Combining these features with the motion detector, it is possible to catch all actions taking place in the area.

* For wall-mounted cameras

High sensitivity minimum required illumination Minimum required illumination is an impressive 0.06 lx at F1.9 in B/N mode and 1.2 lx at F 1.9 in color mode.

## Privacy Masking

When there is a house or even an object as small as a window within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other's privacy. Up to 8
 rectangular masks of arbitrary size can be set. These masking areas may be protected with a 4-digit (max.) password.

Twisted pair terminal (CAT5)
Twisted pair terminal (CAT5) for video signal:
NVTI NVT built-in UTP video
Tough, Impact-resistant Body
The IP66 compliant weatherproof enclosure can resist tampering by intruders. The drip-proof finishing makes it suitable for outdoor installations.

Built-in Electronic Shutter
A high-speed electronic shutter that is internally switchable for eight modes using a DIP switch allows adjustment
increments from $1 / 50$ to $1 / 10000 \mathrm{sec}$.

## AC / DC Power Source Compatibility

VDC-DP9585P come with power supply terminals of 24 V AC and 12 V to 15 V DC. Select an appropriate source, depending on the location.

Camera Control Unit VAC-70 (sold separately)
Remote set-up provides users with the feeling that they have the camera right beside their monitor. Capable of setting up VDC-DP9585P for all on-screen menu items (intelligent digital motion detector, backlight compensation, white-balance, etc.)

Camera Control Unit VAC-70
(sold separately) See page 33 for details.

## VDC-DP9585P

(Unit: mm)

| MODEL | VDC-DP9585P |
| :---: | :---: |
| Scanning system | PAL standard 625 lines, 50 fields/sec. |
| Image sensor | 1/4" (approx. $3.6 \mathrm{~mm} \times 2.7 \mathrm{~mm}$ ) interline transfer method CCD |
| Picture elements | Total: $795(\mathrm{H}) \times 596(\mathrm{~V})$, Effective: $752(\mathrm{H}) \times 582(\mathrm{~V})$ |
| Horizontal resolution | More than 520 TV lines |
| Minimum illumination 50IRE | 0.06 Ix at max. AGC, with F1.9 lens, BM mode 1.2 Ix at max. AGC, with F1.9 lens, Color mode |
| (approx.) 20IRE | 0.024 Ix at max. AGC, with F1.9 lens, BM mode 0.48 Ix at max. AGC, with F1.9 lens, Color mode |
| Video output level | 1.0 V (p-p) ( $75 \Omega$, composite) |
| Video S/N ratio | More than 50 dB (AGC OFF) |
| Backlight compensation | ON / OFF — Slide SW, ON = Multi-spot photometry (64-section) / Center-zone photometry |
| Day/Night | Auto (High/Low) / Color / BNW: External control |
| White-balance | ATW / AWC / Manual (MWB) / Outdoor (3200) / Indoor (5600) / Fluorescent (FLUO) |
| Gain control | High / Normal / OFF |
| Motion detector | ON / OFF, Motion zoom function |
| Privacy masking | ON / OFF 8 masking |
| Electronic shutter | 1/50, 1/120, 1/250, 1/500, 1/1000, 1/2000, $1 / 4000,1 / 10000 \mathrm{sec}$. |
| Lens | Built-in $2.6 \times$ motorized zoom pan-focus auto iris lens, $\mathrm{f}=2.8$ to $7.3 \mathrm{~mm}(2.6 \mathrm{x})$, F1.9 to 3.0 |
| Synchronizing system | Internal sync. / Line lock |
| Aperture | HIGH (2 step) / NORMAL / OFF |
| Auto mode | Sequential pan / Auto pan |
| Rotation range | Panning: max. 0 to 335 deg Tilting: 0 to 90 deg. |
| Rotation speed | Panning: max. 120 deg / second (preset) Tilting: max. 120 deg / second (preset) |
| Preset position setting | 16 |
| Communications | Coaxial Control: SSP / H-SSP / PELCO-C, RS-485: SSP / PELCO-D |
| Environmental conditions | Temperature: $-10^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C}\left[+14^{\circ} \mathrm{F}\right.$ to $122^{\circ} \mathrm{F}$ ], Humidity: within 90\% RH |
| Enclosure rating | IP66 |
| Power requirement | $24 \mathrm{~V} \mathrm{AC} \pm 10 \%, 50 \mathrm{~Hz}$ or 12 V to 15 V DC |
| Power consumption (approx.) | 7.0 W (without heater), 14.0 W (with heater) |
| AC Adaptor | Not included |
| Dimensions (approx.) | $\varnothing 162 \times 114.8$ mm [ $\varnothing 6.4 \times 4.5 \mathrm{in}$. |
| Weight (approx.) | 1.5 kg (52.9 oz.) [without options] |

Heater board VA-50H (sold separately)
Heater board providing protection from cold for camera unit. Allows use in $-30^{\circ} \mathrm{C}$ operating environments. ( 24 V AC only)

## PTZ Operations

VCC-P9575P comes with a PT mechanism and allow panning of 335 degrees ( 55 degrees*) and tilting of 90 degrees ( 90 degrees*) to reduce blind spots in the surveillance area.
When particular angles are preset on the camera (up to sixteen points), it moves to each position quickly at the speed of $120 \mathrm{deg} / \mathrm{sec}$ max. for both panning and tilting. Combining these features with the motion detector, it is possible to catch all actions taking place in the area.

* For wall-mounted cameras

## Privacy Masking

When there is a house or even an object as small as a window within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other's privacy. Up to 8 rectangular masks of arbitrary size can be set. These masking areas may be protected with a 4-digit (max.) password.

Twisted pair terminal (CAT5)
Twisted pair terminal (CAT5) for video signal:

## NVI NVT built-in UTP video

## Built-in Electronic Shutter

A high-speed electronic shutter that is internally switchable for eight modes using a DIP switch allows adjustment increments from $1 / 50$ to $1 / 10000 \mathrm{sec}$.

AC / DC Power Source Compatibility
VCC-P9575P comes with power supply terminals of 24 V AC and 12 V to 15 V DC. Select an appropriate source, depending on the location.

Camera Control Unit VAC-70 (sold separately)
Remote set-up provides users with the feeling that they have the camera right beside their monitor. Capable of setting up VCC-P9575P for all on-screen menu items (intelligent digital motion detector, backlight compensation, white-balance, etc.) *See page 33 for details.

## Other features

- Includes intelligent motion detector
- Display of assignable camera ID and titles (16 characters max.)

## VCC-P9575P

(Unit: mm)

| MODEL | VCC-P9575P |
| :---: | :---: |

1/4" Color CCD High-resolution Weatherproof

## Zoom Camera

VCC-XZ200P
PAN-F©CUS
DAY NIGHT
2.6x

Optical Zoom

## Adjustable Arm

The angle of the arm is adjustable in all directions. Since the flexible joint is secured by screws, the arm maintains its position without sagging over time. In addition, a safety wire is included to prevent accidents. Installation on a ceiling or wall is easy without any additional parts. The wires are

Integrated flexible arm securely protected inside the arm.

## Intelligent switching from Color to B/W

Selecting Color or B/W mode can be done automatically by the camera, or else manually. In addition, the user is allowed to change the switchover point from 1 to 10 lx (nominal) using the on-screen menu. The integration of Color and high sensitivity $\mathrm{B} / \mathrm{N}$ modes in one camera makes it a versatile tool for any surveillance need. It is truly an all-in-one camera.

## Flexible Motion Detector

The Flexible Motion Detector enables reliable and accurate motion detection by analyzing the magnitude of movement and the size of object from changes in picture brightness. When a moving object is detected, VCC-XZ200P can send an alarm signal* to external units and/or switch to the optical zoom mode that can be preset either to 1.0x, 1.4x, 2.0x, or 2.6x zoom.

* Only when using VA-20LAN or VA-20ST board option

## Privacy Masking

When there is a house or even an object as small as a window within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other people's privacy. Up to 4 rectangular masks of arbitrary size can be set per screen. These masking areas may be protected with a 4-digit (max.) password.

## Easy Setup with an On-screen Menu

The VCC-XZ200P offers an on-screen menu for setting up the camera any desired way.

## Other features

- Display of assignable camera ID and title (16 characters max.)

Camera Control Unit VAC-70
(sold separately) See page 33 for details.

## VCC-XZ200P

(Unit: mm)

| MODEL | VCC-XZ200P |
| :---: | :---: |

| Weight (approx.) | 1.56 kg [55.0 oz.] (without sunshade) 1.76 kg [62.1 oz.] (with sunshade) |

Network board VA-20LAN (sold separately)
This expansion board for network connection enables SANYO color CCD cameras to connect to a network. The user can operate a network connected camera using a web browser (Internet Explorer). It comes with the VA-SW3050LITE viewer software.

SSP+Twisted pair board VA-20ST (sold separately)
Coaxial control : SSP / H-SSP / PELCO-C
RS-485: SSP / PELCO-D
Twisted pair terminal (CAT5) for video signal: WVT built-in UTP video
NOTE: The VA-20LAN and the VA-20ST cannot be used concurrently.
Heater board VA-50H
(sold separately)
The heater board protects the camera from cold weather.
It allows the camera to operate at temperatures as low as $-30^{\circ} \mathrm{C}$. ( 24 V AC only)

This expansion board for network connection enables SANYO color CCD cameras to connect to a network. The user can operate a network connected camera using a web browser (Internet Explorer). It comes with the VA-SW3050LITE viewer software.

## JPEG compatible

Network board VA-50LAN (sold separately)

## Applicable models

VDC-DP7585P / VCC-P7575PA
Network board VA-51LAN (sold separately)
PoE / Audio transmission
Applicable models
VDC-DP7585P / VCC-P7575PA

Network board VA-20LAN (sold separately)

## Applicable models

VCC-XZ200P
Network board VA-80LAN (sold separately) Audio transmission
Applicable models
VCC-9800P series / VCC-9700P series /
VCC-9600P series / VCC-9500P series

JPEG / H. 264 compatible Coming soon
Network board VA-82LAN (sold separately
Applicable models
VCC-9800P series / VCC-9700P series /
VCC-9600P series / VCC-9500P series

## Network recorder VA-SW3050 (sold separately)

The network recorder VA-SW3050 is an application program that extends the network operation of the camera. By installing this software, it is possible to monitor images from multiple cameras on a split screen and access and operate up to 128 cameras over a network. This is in addition to standard features such as monitoring and recording live images, playing back recorded video, etc. It is an exclusive software package for CCD cameras that even enables alarm and timer recordings.

## VA-SW3050 Features (Standard specifications)

- Accessible to up to 128 cameras.
- Can split the display into one, four or sixteen screens.
- Recording can be set to start automatically by timer or by alarm.
- Image searching function can search through recorded images for a playback.
- Images on the monitoring display can be printed and saved.
- Changes camera settings, and controls cameras remotely.
- Up to ten users can be registered for each computer, and the operational authorization level can be set differently for each camera.
- Up to 16 computers can access one camera simultaneously (including access from a web browser).
- There are a variety of other optional functions to facilitate monitoring operation.

## System Requirements

| Model | VA-SW3050 |
| :---: | :---: |
| PC | IBM PC/AT and compatibles |
| OS | Windows ${ }^{\circledR} 2000$ Professional SP4, <br> Window ${ }^{\circledR}$ XP Home Edition SP2, Windows ${ }^{\circledR}$ XP Professional SP2 |
| CPU/Memory | When the number of cameras connected is 4 or fewer: CPU: Pentium ${ }^{\circledR} 4,2.0 \mathrm{GHz}$ or higher, Memory: 512 MB or more |
|  | When the number of cameras connected is between 5 and 16: $\mathrm{CPU}:$ Pentium ${ }^{\ominus} 4,3.0 \mathrm{GHz}$ or higher, Memory: 1 GB or more |
| MEMO | When you record live videos from 17 or more cameras simultaneously on a single PC, recording operation may fail depending on your monitoring system configuration. When the recording operation fails, add PCs used for recording so that the number of cameras to record simultaneously per PC becomes 16 or fewer. |
| Network interface | 100BASE-TX |
| Display card | $1024 \times 768$ pixels or higher, 16 million colors or higher AGP graphics card supporting hardware overlay Or PCI Express graphics card (Requires the latest Direct ${ }^{\circledR}$ 9.0c compatible driver.) |
| Recommended ATI | RADEON9000 series or higher |
| graphics chip nVidia | GeForce4 series or higher Quadro4 series or higher |
| Matrox | MillenniumP series or higher |
| Voice | Sound card and speakers with $100 \%$ DirectX® compatibility |

## *DFFC Function

Alleviates jaggies around edges and blurring caused by the time difference in displaying two fields. With the DFFC modes, the DFFC function is automatically activated when motion is locally detected to allow surveillance images free of blurring even when the subject is in motion.

1/4" Color CCD High-resolution Weatherproof Auto Focus Zoom Camera
VCC-XZ400P

## All-in-one Design Weatherproof Camera

Integrated Unit for Easy Installation
An all-in-one package with autofocus camera, lens, weatherproof housing, wall-mount fittings and a sunshield. Installation of the sunshield is optional depending on the environment. Without the sunshield, the camera is very compact and all you need to do is set it up with system devices of your choice.
No other accessory needed.

## Adjustable Arm

The angle of the arm is adjustable in all directions. Since the flexible joint is secured by screws, the arm maintains its position without sagging over time. In addition, a safety wire is included to prevent accidents. Installation on a ceiling or wall is easy without any additional parts. The wires are securely protected inside the arm.

## Max. 352x Zoom

22x Optical Zoom and 16x Digital Zoom
The 22x optical zoom and 16x digital zoom produce a combined close-up effect of $352 x$. This makes it possible to monitor details of even a far-off subject, allowing one camera to monitor a wide area.

Intelligent Switching from Color to B/W
Selecting Color or BM mode can be done automatically by the camera, or else manually. In addition, the user is allowed to change the switchover point from 1 to 10 lx (nominal) using the on-screen menu. The integration of Color and high sensitivity $\mathrm{B} / \mathrm{W}$ modes in one camera makes it a versatile tool for any surveillance need. It is truly an all-in-one camera.

13 Mode Electronic Shutter Speeds
$2 x, 4 x, 8 x, 16 x, 32 x, 1 / 50,1 / 120,1 / 250,1 / 500,1 / 1000$,
$1 / 2000,1 / 4000$, and $1 / 10000 \mathrm{sec}$.

## Privacy Masking

When there is a house or even an object as small as a window within the camera frame, it is possible to mask the area so that it will not appear on the monitor screen to protect other's privacy. Up to 4 rectangular masks of arbitrary size can be set per screen. These masking areas may be protected with a 4-digit (max.) password.

Camera Control Unit VAC-70
(sold separately) See page 33 for details.

## 3 variations

Wide Dynamic Range, Day/Night camera, or color Highresolution camera available. $2.3 \times$ vari-focal lens is ideal for interior. Weatherproof construction also makes it suitable for outdoor use. (IP66 rated)

## IP66

VDC-W1595VP, VDC-D1585VP, and VDC-C1575VP are all designed to fight off dust and water. The IP66 compliant package makes them suitable for outdoor installation at locations exposed to wind and rain. Of course, this does not prohibit the use for indoor applications.

Wide dynamic range for clear images of high-contrast subjects (VDC-W1595VP)
When using a conventional camera, monitoring of windows, doors and other strongly backlit areas can result in featureless blacks and transparent whites. With the newly developed wide-dynamic-range technology, however, two shutter speeds, one normal $(1 / 50)$ and the other high speed, are employed to record clearer images of the subject by extracting highlights and shadows from the two shots and then combining them into a single detailed image.

1/3" Color CCD High-resolution
Vandal-resistant Dome Camera with Vari-focal Iens VDC-D1585VP

Sharp image with 520 TV lines
The VDC-D1585VP and VDC-C1575VP deliver 520 TV lines.
The DSP with a proprietary algorithm produces sharp outlines and natural color with no color smudges.

## 1/3" Color CCD Wide Dynamic Range Camera VCC-WD8575P

Wide dynamic range for clear images of
high-contrast subjects
When using a conventional camera, monitoring of windows, doors and other strongly backlit areas can result in featureless blacks and transparent whites. With the newly developed wide dynamic range technology, however, two shutter speeds, one normal $(1 / 50)$ and the other high speed, are employed to record clearer images of the subject by extracting highlights and shadows from the two shots and then combining them into a single detailed image.

## Electronic zoom

The VCC-WD8575P incorporates a $2.5 x$ electronic zoom. Activated as an alarm zoom when triggered by an external alarm sensor or as a motion zoom when motion is detected within the field of view, it serves to automatically enlarge surveillance images for verification when the unexpected occurs.

Built-in Intelligent Digital Motion Detector and Intelligent Zoom Detector The Intelligent Digital Motion Detector enables reliable and accurate motion detection by analyzing the magnitude of movement and the size of object and other factors from changes in picture brightness. When a moving object is detected, VCC-WD8575P can send an alarm signal to external units and/or switch the picture to up to $2.5 x$ electronic zoom mode. Furthermore, an external alarm input terminal makes it possible, when an alarm signal is received, to automatically zoom in to the site of activity, according to a preset zooming operation.

-Built-in Electronic Shutter •Privacy Masking •40x sensitivity boost for minimum illumination of $0.002 \mathrm{~lx} \bullet$ Easy on-screen setup and adjustment of default settings

## Technical Notes

## Formula for determining the minimum subject <br> illumination for different $F$ value

The amount of light passed through a lens is expressed by a value called "aperture value" (F value or F number). When the aperture is fully open (maximum aperture), the maximum amount of light is passed through the lens. This is the lens' brightness and is expressed by the "maximum aperture F value". The maximum aperture $F$ value is obtained by dividing the focal length with the lens diameter (D). The capital letter " $F$ " is used to distinguish it from " $f$ ", which means the focal length.
$\begin{aligned} & \text { Standard minimum } \\ & \text { subject illumination }\end{aligned} \times\left(\frac{\text { Target } F \text { value }}{\text { Lens } F \text { value used for measurement }}\right)^{2}$

## Example:

For a lens of F1.2, use the value of 1.0 lx which is obtained by actual measurement. $\rightarrow$ When using a lens of F1.4:

$$
1.0 \times\left(\frac{1.4}{1.2}\right)^{2}=1.4 \mathrm{~lx}
$$

When using a lens of F 1.6 :

$$
1.0 \times\left(\frac{1.6}{1.2}\right)^{2}=1.8 \mathrm{~lx}
$$

SANYO defines the minimum subject illumination to be the level that produces the signal level of 50 IRE in measuring camera performance.

For the comparison of the minimum subject illumination: Always confirm the $F$ value and the IRE level used in the measurement. If the $F$ value and the IRE level do not match, then convert the values in camera specifications using the following method.

F1.2, 50IRE 1.0 lx

F1.2, 20IRE
$1.0 \times \frac{20}{50}=0.4 \mathrm{~lx}$

$$
\begin{aligned}
& \text { F1.4, } \\
& \text { 50IRE } \\
& \text { F1.4, } \\
& \text { 20IRE }
\end{aligned} 1.0 \times\left(\frac{1.4}{1.2}\right)^{2}=1.4 \mathrm{~lx} \frac{20}{50}=0.56 \mathrm{~lx},
$$

## Camera Mount Base

VCT-92

- Ideal for a location requiring many cameras.
- Simply installing dummy cameras helps prevent crime.

- Maximum turning angle $360^{\circ}$ horizontally and $115^{\circ}$ vertically
- Maximum bearing weight 1.5 kg

## Dome Camera Housing

Camera Mount
VCT-31
VA-CDH60 (smoked cover) VA-CDH60C ${ }_{\text {(Clear cover) }}$

Camera Control Unit VAC-70

- Possible to guide cable through pipe
- Maximum turning angle
$360^{\circ}$ horizontally and $105^{\circ}$ vertically
- Maximum bearing weight 4 kg

(Unit: mm)

| MODEL | VA-CDH60 / VA-CDH60C |

## SSP System Controller VSP-9000

## SSP System Controller VSP-8500

## Backlit LCD with a touch screen (VSP-9000)

The $320 \times 240$ LCD screen installed on the front panel also serves as a touch panel. Settings, operation, and control of even a large-scale system can be done by touching the screen and displaying the menu. The touch panel offers easy access to otherwise complicated settings and operations.

Touch the buttons displayed on the screen

The display changes at each touch

- The menus and sub menus can be set by pressing the keys represented by the icons

Simple Keystrokes on the VSP-8500 Controls DVRs and PTZ Cameras

Customization of up to 26 user maps (VSP-9000) The VSP-9000 LCD touch panel simplifies the operation of today's increasingly complex medium- to large-scale security systems. - User maps can easily be designed by PC GUI and uploaded on the VSP-9000 through RS-232

40 free configurable macro-function keys for each map (VSP-9000)
Allows the operator to control individual devices by assigning an address to each device.

Telemetry control using 3-axis joystick (Pan/Tilt/Zoom)
To control digital video recorders, cameras, and other devices, the VSP-9000 / VSP-8500 controller is equipped with a 3 -axis joystick. The joystick guarantees easy operation from
 a remote location.

VSP-9000 / VSP-8500 rear panel

RJJ 11 connector $(\times 3$ ) Video line: Multiplexer, DVR etc Telemetry line ( A \& B): Camera etc

## Quality Digital Recording

DIGITAL NETWORK SOLUTIONS The DSR series utilizes JPEG2000, M-JPEG, and MPEG video compression methods to offer clear and sharp crispy video recording. Simultaneous recording and playback is now possible with elegantly smooth motion

## Network

Remote Control from a PC
Each unit in the DSR series features a Network terminal*. Monitoring live video, playing back and reviewing recordings, starting a new recording, searching for recorded images, camera control, camera setup - all operations are possible from a PC with a network connection (using Internet Explorer version 5.0 or newer). It also enables the user to download recorded video and audio on to the PC.

* DSR-300P requires communication board VZU-COM300.

The DSR Series models use either JPEG2000, Motion JPEG or MPEG format, each of which has its own characteristics and advantages, so please select the DSR Series model most suitable for your requirements.
Characteristics of Video Compression

| Model | Content | Characteristics |
| :---: | :---: | :---: |
| DSR-5009PA <br> DSR-5016PA <br> DSR-5709P <br> DSR-5716P | Video using JPEG2000 compression | A high compression rate is achieved while eliminating block noise and pixelation associated with the JPEG format. |
| DSR-300P <br> DSR-3706PA <br> DSR-3709PA <br> DSR-3716PA | Video using Motion JPEG compression | Motion pictures are produced by successive decompressionreproduction of frames recorded in JPEG format. Compared to MPEG, the compression rate is lower and the picture quality is higher. |
| DSR-M810PA DSR-M814PA | Video using MPEG-2 compression | The DSR-M81x series adopts MPEG-2 format, the de facto standard for color motion picture compression. |
| DSR-2004 <br> DSR-2016 DSR-HB8000 | Video using MPEG-4 compression | The MPEG-4 standard was designed to reproduce a wide range of moving pictures from those on a low speed communication line to those with highdefinition TV picture quality. |

## Recorder Function Explanation

## Legends

Number of Number of $\qquad$ — Terminals

Whecording
When an alarm signal is received from an external sensor, the Recorder will automatically start recording in a mode predetermined by the user.

## (7) Alarm counter

This feature allows the user to keep and display records of the date and time of alarms

## 8 Video loss alarm

When the video signal feed is lost due to one of the following reasons, a buzzer sounds and the word "VIDEO
LOSS" is displayed on the screen.

1. Wire breakdown
2. Disconnection of video terminal
3. Loss of power on a camera or other intermediary equipment

## 9 Disk full alarm

During a recording, an alarm can be set to give off a buzzer sound, along with a message on the display.

## (10) Fan error / Disk error

A beep will sound when an error occurs on the fan or the disk.

## (11) Time / Date search

Searching recorded pictures is available by specifying the time and date.

## (12) Alarm search

A list of up to 8 stored recordings (alarm number, recording date and time) along with a preview window offers the user an easy way of searching and playing back a particular event. You can easily switch to a full screen display and display a still picture, or perform a fast-forward search simply by turning the shuttle or jog dial.

## (13) Alarm thumbnail search

It is possible to display up to 9 thumbnails for video recordings in the alarm area along with their respective alarm numbers. This feature allows the user to search for a particular event without playing back each recording.

## (14) Alarm log search

A search is narrowed using a log file by selecting the time, minute, month, and the day of the week on a GUI, and then the desired scene can be selected.
*Only DSR-5009PA, DSR-5016PA, DSR-5709P and DSR-5716P

## (15) Motion detection search

By setting a motion sensor on the screen, any scene with motion in the specified area will be brought up for further review.
*Does not apply to DSR-M810PA and DSR-M814PA

## (16) Archive area search

A list of up to 8 stored recordings (copied to archive area, recording date and time), along with a preview window, offers the user an easy way of searching and playing back a particular event. You can easily switch to a full screen display and show a still picture, or perform a fast-forward search simply by turning the shuttle or jog dial.
*Does not apply to DSR-M810PA, DSR-M814PA, DSR-2004, DSR-2016 and DSR-HB8000

## (17) Camera telemetry

The DVR front panel can be used to control connected cameras. *Does not apply to DSR-3706PA, DSR-300P, DSR-M810PA and DSR-M814PA

## 8 Clock adjustment

If multiple Recorders are used, using this feature forces timers on all machines to be synchronized to the master Recorder once a day at the preset time.

## (19)Security lock

To prevent unauthorized manipulation or accidental operation while recording, the user can lock the functionality of the operation buttons, the jog dial, and the shuttle ring. There are two types of security lock: a quick method security lock and a 4 digit security lock.

## 20 Auto Delete Function

The allows the user to specify the storage period for each video clip, from one day up to 99 days.
When the specified period expires, the data will be automatically deleted.

## (21) 30-day memory back-up

A built-in lithium battery is used to protect various DVR settings for 30 days.

## (22) Lifetime counter

The monitor screen displays "used-time" counter (total power-on time.)

## Buzzer

An alarm is indicated by a beep.

## SMTP

An alarm can trigger an e-mail message sent to a preset address.

## Series Connection

DSR series facilitates channel by channel series connection between multiple units through the connection of each channel's VIDEO IN/OUT terminals, along with the connection of the SERIES IN/OUT terminals. When the master DVR runs out of storage capacity, recording automatically switches to the second DVR and onward to enable unlimited expansion of storage capacity and recording time.

## 26) VGA output

## USB terminal

Useful in connecting an external disk writer and/or CF reader.

* Does not apply to DSR-300P

## CF slot

Increases data portability and MENU
downloading/uploading by allowing the use of a compact
flash memory or a microdrive.

## Netand Network terminal

There is a built-in 100BASE-TX / 10-BASE-T LAN terminal, allowing remote surveillance / control from PC via LAN.

## SSP (RS-485/422) compatible

By using SSP (SANYO Security Serial Protocol), cameras, multiplexers, DVRs and VCRs in a daisy chain over a distance of up to 1200 m ( 4000 feet) can be controlled centrally with just one controller.

## RS-232C compatible

With RS-232C compatible recorders various operations are possible from an external computer.

DSR-3709PA / DSR-3706PA. See page 46, 47

16ch Hybrid Digital Video Recorder

## DSR-HB8000

Preliminary

MPEG-4
The MPEG (Moving Picture Experts Group) 4 standard was designed to reproduce a wide range of moving pictures from those on a low speed communication line to those with highdefinition TV picture quality. Also available is SANYO's proprietary format, the MPEG-4+ mode, which requires less resources. It is more advantageous in networks, enabling smooth video reproduction with a special playback operation.

Simultaneous Recording and Playback ( $720 \times 576$ pixels)
New digital security system will be composed analog and network cameras into a system The DSR-HB8000 is a hybrid model that is capable of connecting and controlling network cameras and conventional analog cameras simultaneously.

Keyboard
(Packaged)

Conceptual diagram for a network with a DSR-HB8000 at the hub

for displaying camera images

PCI bus, S-ATA expansion board

Large Capacity HDDs up to 3.75TB Easy data storage/management

- One system disk (S-ATA)
- Two S-ATA HDD bays
- One removable S-ATA HDD tray - Two HDD w/S-ATA card

PC

TCP/IP Access
Emulates up to four external DVR servers on the network

- Internal DVD/CD drive
- Internal Removable HDD (S-ATA)
- USB 2.0 ports
(front x 2, rear x 2)
- NAS* (TCP/IP)

Alarm out
(x 16)
(x 16)

PTZ Cameras
Up to four surveillance cameras with networking capability

Analog Cameras
Up to sixteen cameras including network cameras

- SVGA Monitor
- Video loop monitor only
- Analog monitor
- Multi-screen analog monitor

Monitor
Reproduces camera images virtually in full motion in different display modes, from full screen to up to sixteen split screens.

Mouse (Packaged)

## Camera Telemetry Control

DSR-HB8000 is capable of controlling PTZ dome cameras and zoom cameras through coaxial cables or RS-485. It also allows this control from a network PC or a controller. The unit also supports protocols of other major brands.

Full-motion, Multiple Screen Display of Live Video Images The monitor can display different video images from 4ch up to 16ch simultaneously, in addition to displaying a single channel in full-screen mode.

## Extensive Search Functions

One Channel Search:
Searches for recorded video on a specific channel and plays it back.

## Time/Date Search:

Playback recorded video by specifying date and time.
Thumbnail Search:
Displays a list of up to 24 images from the checked video in panorama mode.

## Motion Search:

Using motion detection, searches for video containing moving objects.

Time Bar Search:
Displays a data mapping of recorded video on all channels and playback multiple video in multi-screen.

## Text Search:

Searches for texts and video using keywords in a POS (Point of Sales System) recording data.

## Alarm Log Search:

Searches for video from an event list.

## Monitor Plus

By connecting four DSR-HB8000 units via a network, this feature offers a capability to view all 80 camera images on the main DSR-HB8000 unit.

This monitor can view all $\mathbf{8 0}$ cameras
16 cameras on DVR 1
16 cameras on DVR 4
16 cameras on DVR 216 cameras on DVR 5 16 cameras on DVR 3

## Add Text Information on the Surveillance Video

Recorded images can be looked up using the text data in the electronic journal. The AVE Interface provides access to the journal data containing information on a POS system or ATM terminals. For example, a transaction record on such systems can identify the operator, the time and date, the terminal, or the customer for any deposit, withdrawal, or exchange. This will serve as a valuable tool in enhancing the security system.

Easy and Secure Backup
With the DSR-HB8000, the user can simply click on the Data Back-up icon on the Surveillance screen to store and manage a large amount of information on the network. In addition to the built-in HDD, a CD-R, CD-RW, or DVD on the integrated CD/DVD drive or a memory stick on the USB port can be selected as a backup destination.

| MODEL |  | DSR-HB8000 |
| :---: | :---: | :---: |
| General Hard disk capacity |  | One System Disk (S-ATA) + Two S-ATA HDD Bays + One Removable S-ATA HDD Tray + Two HDD w/S-ATA card (option) Max. HDD Capacity 3.75TB |
|  | CPU | Intel Pentium® 43.00 GHz |
|  | RAM | 512MB, DDR2 PC2-4200 |
|  | Operating system | Microsoft Windows ${ }^{\circledR}$ XP Embedded |
|  | Picture resolution (pixels) | $720 \times 576,720 \times 288,360 \times 288$ |
|  | Video codec | MPEG-4, MPEG-4+ |
|  | Audio codec | G.721, 8 kHz sampling rate |
|  | Picture quality | 5 levels (Basic, Normal, Enhanced, Fine, Super Fine) |
|  | Recording speed | 400IPS/16ch (CIF), 200IPS/8ch (Half D1), 100IPS/4ch (D1) |
|  | Still image capture (BMP/JPEG) | $720 \times 576,720 \times 288,360 \times 288$ |
|  | Number of cameras | 16 (Network camera max. 4 units) |
|  | Menu language | English / French / Spanish / German / Italian / Other *1 |
|  | Telemetry Control Protocol | $\begin{aligned} & \text { COAX: SANYO (H-SSP) / PELCO-C } \\ & \text { RS-485: SANYO (SSP) / PELCO-D / VICON / KALATEL / SENSOMATIC *1 } \end{aligned}$ |
| Search mode |  | One Channel Search, Time/Date Search, Thumbnail Search, Motion Search, Time Bar Search, Text Search, Alarm Log Search |
| Video | Signal format | PAL standard (Color) / CCIR standard (B/W) auto select, 625 lines, 400IPS |
|  | Video input | VBS / VS 1.0 V (p-p) $75 \Omega$, BNC $\times 16$ |
|  | Video output | BNC $\times 16$ (Loop through), VGA $\times 1 * 2$ |
|  | Main monitor output | VS 1.0 V (p-p) $75 \Omega$ BNC $\times 1$ |
|  | Monitor 2 output | VBS / VS 1.0 V (p-p) $75 \Omega$ BNC $\times 1$ |
| Audio | Audio input | 16ch: MicroCross connector x1 (rear) |
|  | Audio output | $-8 \mathrm{dBs} 600 \Omega$ unbalanced mini jack $\times 1$ (rear) |
| Display | Speed (Live) | Max. 400IPS (16 screen split) |
|  | Emulation | Monitor Plus (Up to total 5 DVRs display) |
|  | Screen split | 1, 4, 7, 8, 9, 10, 13, 16 |
| Backup storage support |  | Internal DVD / CD drive, Internal Removable HDD (S-ATA), USB 2.0 ports (front $\times 2$, rear $\times 2$ ), NAS* ${ }^{* 1}$ (TCP/IP) |
| Network Interface |  | ADSL, LAN / Dynamic IP supported |
| LAN |  | RJ-45 x 1, LAN: 1000BASE-TX) Compatible protocol: UDP, TCP/IP, HTTP, DHCP, SMTP, NTP, PPP server |
| Control Signal | RS-485 | RJ-11 $\times 2$, (With a termination switch) |
|  | RS-485(2ND) | COAX PTZ port $\times 1$ |
|  | RS-232C | D-sub 9-pin x 1 |
|  | USB | USB 2.0 Ports $\times 4$ (Front x 2, Rear x 2) |
|  | Sensor alarm input (Push lock) | No-volt contacts, (100ms or more) x 16 |
|  | Alarm output (Push lock) | Open collector, Low level active (Max. 25 mA ) x 16, Relay output |
|  | Mouse control input | PS / $2 \times 1$ |
|  | Keyboard input | PS / $2 \times 1$ |
| Expansion slot |  | PCl -express $\times 2, \mathrm{PCl} \times 3$ |

|  | Power current | 8A (AC100 V), 4A (AC240 V) |
|  | Operating conditions | Temperature: $5^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}\left(41^{\circ} \mathrm{F}\right.$ to $\left.104^{\circ} \mathrm{F}\right)$ Humidity: 30 to $80 \%$ RH (non-condensing) |
|  | Storage temperature | $-5^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}\left(23^{\circ} \mathrm{F}\right.$ to $\left.140^{\circ} \mathrm{F}\right)$ |
| Physical | Dimensions (W x H x D) | $431 \times 177 \times 458 \mathrm{~mm}\left(17.0^{\prime \prime} \times 7.0^{\prime \prime} \times 18.0^{\prime \prime}\right)$ |
|  | Net weight (approx.) | $21.8 \mathrm{~kg}(44.1 \mathrm{lbs}).($ (HDD $\times 4$, DVD-RM $\times 1)$ |
| Standard accessories |  | Keyboard, Mouse, S-ATA cable, Audio cable (RCA), AC power cord, Rack mounting kit |
| Options |  | S-ATA card (Support add S-ATA HDD x 4), POS/ATM ${ }^{* 1}$ (AVE VSI-PRO) |

*1 TBD *2 Either the video output or VGA output can be enabled at any one time

16ch Digital Video Recorder DSR-5716P

## New

SANYO's expertise in the field has made it possible to record and playback simultaneously at a maximum speed of 100 IPS.

## Exclusive Extension Units

The VA-EXH, an external HDD unit for further extending recording time, and the VA-EXD1 B, a disc writer for backingup or copying data to portable media, are both available for the DSR-5716P / DSR-5709P.
(Note) The S-ATA board VZU-SATB1 is needed when connected to the external HDD unit, VA-EXH.

ROI (Region of Interest)
ROI is one of the advanced features included in the JPEG2000 compression method. By setting ROI, it is possible to apply better picture quality for particular areas preset on the screen. The ROI area setting is up to the user.

ROI: OFF BASIC mode (12KB) Use the same amount of data ...

ROI: MAX Static ROI recording (12KB) for enhancing the picture quality of regions of interest

Camera Telemetry Control
The DSR-5716P / DSR-5709P are capable of controlling PTZ dome cameras and zoom cameras through coaxial cables or RS-485. It also allows this control from a network PC or a controller. The unit also supports protocols of other major brands.

Camera control (PTZ cameras \& zoom cameras only) available from the front panel, PC or a controller

Camera with no Alarm Input Controlled by an External Alarm
Through this unit, an external alarm can prompt PTZ cameras such as VCC-9500P / VCC-9600P / VCC-9700P / VCC-9800P to return to preset positions and perform other
 operations. There are four operations available - PRESET, TOUR, AUTO PAN and SEQUENCE. *This control is activated only when the setting of alarm recording is ON and the setting of alarm trigger is the external alarm.

Built-in VGA (1024 x 768 pixels) Terminal The VGA terminal allows direct connection to a PC monitor, which can then be used to monitor surveillance video. It also enables remote terminals to replay video with VGA quality, thus improving the thoroughness of monitoring.

## Supports up to 2TB HDD

The unit has two HDD bays, each supporting up to 2TB HDD to make the unit the right choice in today's trend for bigger drives. Selecting a drive of the same capacity will allow the use of the mirroring* function for data backup.
For the latest available range of optional drives, contact the place of purchase.

## * Mirror Recording

DSR-5716P / DSR-5709P each comes with two HDD bays. With two HDDs of the same capacity installed, it is possible to record the same video on two HDDs, thus allowing for a backup.

## Alarm Log Search

Recordings made during a particular period are shown in a user-friendly GUI. By designating the hour, minute, month, or day of the week of alarm events, a search is performed on a log file to narrow the search and bring up the desired scene.

Multi Alarm Events Copy
Now it is possible to copy recorded video and audio directly to external media without the use of the archive area. This allows the user to retrieve desired video quickly.

## CD-R/RW, DVD+R/+RW

The unit comes with two USB terminals located on both the front and rear panels. Using one of these terminals, it is possible to backup data to CD-R/RW discs (Max. 640MB), DVD+R/+RWV (Max. 4.6GB). The use of discs ensures secure storage of necessary video and audio data. *Recommended products only

## USB Ports

The DSR-5716P and DSR-5709P come with two USB ports, one each on the front and rear panel. The front USB port is handy for using USB memories, for features such as Downloading and Uploading in the setup menu, newly added firmware update, and downloading images. The rear port can be used to connect VA-EXD1B, which enables the downloading of images to a CD or DVD. *When the front and rear USB ports are used simultaneously, the front port is always given priority.

Independent Alarm Recording Rate for Each Channel The unit lets the user set different rates of recording for each camera for recordings activated by the motion sensor or an alarm input. Within the preset time frame, the user has freedom to change the recording rate for each camera according to needs.

Choosing Live Picture Resolution at Remote Terminals When the main unit is set to record video at basic quality, you can still choose enhanced quality for monitoring live video on a remote PC. It is also possible to record super-fine quality pictures on the main unit and monitor the basic quality video on a terminal to reduce network load. In short, the unit allows the user to choose the quality of live video independently, regardless of its recording mode. *This does not apply when the recording is done at the maximum rate of 100 IPS .

## CCTV system Management Software <br> VA-SW5000

By installing the VA-SW5000 software bundled with the unit, remote surveillance of a large-scale system can be easily accomplished from a local PC. System setup and DVR operation is also possible. In addition, it allows simultaneous access of up to eight users. The four-level security feature effectively prevents hacking and maintains the system integrity. Each user is allowed to sign-on independently and can access a maximum of 256 DVR units. Also included in the features is e-mailing any alarm event to a predefined mail address. The user-friendly GUI, which is customized the way only possible with exclusive software, ensures easy operation of the surveillance system.

## System environment

|  | Master computer | Slave computer |

## Optional accessories (sold separately)

External HDD unit
VA-EXH
VA-EXH up to four HDDs enables a drastic increase in recording capacity.

S-ATA Board VZU-SATB1
for VA-EXH
The VZU-SATB1 enables the connection to an external HDD unit.

## Disc writer <br> VA-EXD1 B

Backup important data on
DVD+R/RW discs or CD-R/RW discs with the USB connection.

## SCSI Board VZU-SCB1

The VZU-SCB1 enables the
connection to an external RAID system. For further details on compatible devices, please contact the place of purchase.

16ch Digital Video Recorder DSR-5016PA

## Made in Japan

High performance DVR adopting JPEG2000 format.
Features high-speed recording at 100 IPS and superior networking capability, plus expandability for future needs.

JPEG2000
Simultaneous Recording and Playback at 100 IPS ( $720 \times 288$ pixels)

Full-motion, Multiple Screen Display of Live Video Images Multiple live video images can be viewed simultaneously in 16,9 , or 4 split-screen display at the speed of 50 IPS/channel. Full screen display is also available. Select the desired display mode without worrying about the update speed.
It is also possible to see multi-screen display on the second monitor (MON2).

## Audio Recording Available

Audio recording is available for recording speeds from 100 IPS to 1 IPS. (A 2ch audio input is provided.)

ROI (Region of Interest)
ROI is one of the sophisticated features included in the JPEG2000 compression method. By setting ROI, It is also possible to save storage space by assigning lower picture quality for insignificant areas. The user can set up to three different ROI areas.
In addition, by applying ROI, the user can select a particular area to be recorded with better picture quality when any change in brightness is detected.

BASIC mode (8KB)

Supports up to 2TB HDD per one bay
The unit has two HDD bays.

## *Mirror Recording

DSR-5016PA / DSR-5009PA each comes with two HDD bays. With two HDD's of the same capacity installed, it is possible to record the same video on two HDDs, thus allowing for a backup.
Longer recording time with an expansion unit
The DSR-5016PA / DSR-5009PA can be connected to an external HDD unit VA-EXH to further increase storage capacity. The VA-EXH has four HDD bays, each supporting up to 2TB. Also, an optional SCSI board VZU-SCB1 enables connection to a RAID unit.*
*For further details on compatible devices, please contact the place of purchase.

Made in
Japan

Five Different Picture Qualities and 28 Recording Speeds Enable Flexible Settings
The picture quality is selectable from BASIC, NORMAL, ENHANCED, FINE and SUPER FINE.

## Alarm Log Search

Recordings made during a particular period are shown in a user-friendly GUI. By designating the hour, minute, month, or day of the week of alarm events, a search is performed on a log file to narrow the search and bring up the desired scene.

Three Recording Modes for Flawless Recording DSR-5016PA / DSR-5009PA has three recording modes; Alarm, Timer, and Program. The three modes can operate individually or in any combination.

Alarm Recording<br>Pre-alarm Recording<br>Timer Recording<br>Programmed Recording

## Extensive Display Options

For both live picture monitoring (during multiplex recording) and playback of pictures, the user can select from 16 -screen, 13 -screen, 9 -screen, 6 -screen, 4 -screen display, and full-screen (1-screen) display.

- Plus display
- Screen position assignment
- Monitor masking

## Camera Telemetry Control

The DSR-5016PA / DSR-5009PA are capable of controlling PTZ dome cameras and zoom cameras through coaxial cables or RS-485. This control also possible from a network PC or a controller. The unit also supports protocols of other major brands.

* SSP (SANYO Security Serial Protocol) is a communication protocol for security devices developed by SANYO.

A Camera with no Alarm Input Controlled by an External Alarm Through this unit, an external alarm can prompt PTZ cameras such as VCC-9800P series to return to preset positions and perform other operations. There are five operations available PRESET, TOUR, AUTO PAN, SEQUENCE, and AUTO FOCUS.
*This control is activated only
 when the setting of alarm recording is "ON" and the setting of alarm trigger is the external alarm.

## Multiple Backup Methods Depending on Data Size CD-R/RW, DVD+R/+RW

The unit comes with two USB terminals located on both the front and rear panels. Using one of these terminals, it is possible to backup data to CD-R/RW discs (Max. 640MB), DVD+R/+RW (Max. 4.6GB). The use of discs ensures secure storage of necessary video and audio data. (Two USB terminals cannot be used simultaneously. The front USB terminal has the higher priority.)

## One Touch Multi-Channel Copy

 Multiple channels can be copied to various media with a single operation. Use the camera select buttons on the front panel to select desired cameras and start recording. Pressing the MULTI button will select all cameras simultaneously.

Multi-screen Display for Network PCs The DVR Viewer2 software allows the user to select from full-screen, Quad, Multi-9, and Multi-16 displays on any PC on the network. The DVR Viewer2 software is automatically downloaded by copying an image. It is also available for download on our website.

## CompactFlash or Microdrive

DSR-5016PA / DSR-5009PA comes with a CF Type II expansion slot. It allows the user to export video data to a CompactFlash or Microdrive, and provides an easy way to store data or transfer it to a PC. Downloading and uploading of setup menus by use of a CF card offer an easy option for setting up additional DSR-5016PA / DSR-5009PA recorders. *Recommended products only

## Network Features

The DVR is operable from a PC.

## CCTV system Management Software VA-SW5000

By installing the VA-SW5000 software
 bundled with the unit, remote surveillance of a large-scale system can be easily accomplished from a local PC. System setup and DVR operation is also possible. In addition, it allows simultaneous access of up to eight users. The four-level security feature effectively prevents hacking and maintains the system integrity. Each user is allowed to sign-on independently and can access a maximum of 256 DVR units. Also included in the features is e-mailing any alarm event to a predefined mail address. The user-friendly GUI, which is customized the way only possible with exclusive software, ensures easy operation of the surveillance system.

## Optional accessories (sold separately)

## External HDD unit VA-EXH

VA-EXH up to four HDDs enables a drastic increase in recording capacity

## Disc writer VA-EXD1 B

Backup important data on DVD+R/RW discs or CD-R/RW discs with the USB connection.

## SCSI Board VZU-SCB1

The VZU-SCB1 enables the connection to an external RAID system.
For further details on compatible devices, please contact the place of purchase.

16ch Digital Video Recorder DSR-3716PA

## Audio Recording Available

Audio recording is available for recording speeds from 50 IPS to 1 IPS.
(Audio input must be a single channel.)
Supports up to 1TB HDD per one bay
The unit has two HDD bays.

## *Mirror Recording

DSR-3716PA / DSR-3709PA each comes with two HDD bays. With two HDD's of the same capacity installed, it is possible to record the same video on two HDDs, thus allowing for a backup.

## Five Different Picture Qualities and 27 Recording

 Speeds Enable Flexible SettingsThe picture quality is selectable from BASIC, NORMAL, ENHANCED, FINE and SUPER FINE.

## Three Recording Modes for Flawless Recording

 DSR-3716PA / DSR-3709PA has three recording modes; Alarm, Timer, and Program. The three modes can operate individually or in any combination.Simultaneous Recording and Playback at 50 IPS The simultaneous recording and playback function makes it possible for the user to review recorded images without interrupting the recording in progress.

Full-motion, Multiple Screen Display of Live Video Images
Multiple live video images can be viewed simultaneously in 16, 9 , or 4 split-screen display at the speed of 50 IPS/channel. Full screen display is also available. Select the desired display mode without worrying about the update speed.

| $501 P S$ | $501 P S$ |
| :--- | :--- |
| $501 P S$ | $501 P S$ |

The maximum number of cameras for DSR-3709PA is nine respectively.

Pre-alarm Recording/Alarm Recording/Timer Recording The timer recording mode allows the user to set eight different settings. Different settings for each day of the week and multiple settings for the same day are possible. It is also possible to specify the start / stop time or use a different recording speed. e use can select from 16 -screen, 13 -screen, 9 -screen, 6 -screen, 4 -screen display, and full-screen (1-screen) display.

\author{

- Plus display <br> - Screen position assignment <br> - Monitor masking
}

The maximum number of cameras for DSR-3709PA is nine respectively.

## Camera Telemetry Control

The buttons on the DSR-3716PA / DSR-3709PA front panel allow the user to control PTZ / zoom cameras. The unit transmits SSP* signals by overlaying them on to the video signal through a coaxial cable. This makes it possible to control cameras that support coaxial SSP transmission, without any additional device other than a video cable, not only from the front panel, but also from a SANYO controller or via a network. In addition, BBV and PELCO cameras can also be controlled if they support coaxial signal transmission.

* SSP (SANYO Security Serial Protocol) is a communication protocol for security devices developed by SANYO.

A Camera with no Alarm Input Controlled by an External Alarm Through this unit, an external alarm can prompt PTZ cameras such as VCC-9800P series to return to preset positions and perform other operations There are five operations available - PRESET, TOUR, AUTO PAN, SEQUENCE, and AUTO FOCUS.

*This control is activated only when the setting of alarm recording is on and the setting of alarm trigger is the external alarm

## Multiple Backup Methods Depending on Data Size CD-R/RW

Through USB terminals located both on the front and rear panels, it is possible to backup data in the HDD archiving area to CD-R/RW discs. The use of discs assures secure storage of necessary video and audio data. (Two USB terminals cannot be used simultaneously. The front USB terminal has the higher priority.)

## One Touch Multi-Channel Copy

Multiple channels can be copied to various media with a single operation. Use the camera select buttons on the front panel to select desired cameras and start recording. Pressing the MULTI button will select all cameras
 simultaneously.

Multi-screen Display for Network PCs The DVR Viewer2 software allows the user to select from full-screen, Quad, Multi-9, and Multi-16 displays on any PC on the network. The DVR Viewer2 software is automatically downloaded by copying an image. It is also available for download on our website.

## CompactFlash or Microdrive

DSR-3716PA / DSR-3709PA come with a CF Type II expansion slot. It allows the user to export video data to a CompactFlash or Microdrive, and provides an easy way to store data or transfer it to a PC. Downloading and uploading of setup menus by use of a CF card offers an easy option for setting up additional DSR-3716PA / DSR-3709PA recorders.

Print Directly from a CF Card or a Microdrive
As for the recommended products, visit our website
www.sanyosecurity.com or contact the place of purchase

## AV Output Terminal on the Front Panel

 These terminal can be used for supplying signals to a consumer VCR or DVD recorder, thus enabling the use of analog video tapes and DVD discs as recording media. When a TV monitor is connected, the same video signal as the main monitor can be supplied to it, including the menu screen.Network Features
The DVR is operable from a PC.

- Duplex Recording with 1-Image Switching • Two-level password security lock (admin / user) • Video loss alarm • 30-day memory backup • Resume function • Disk full alarm • On-screen mode setting, menu languages built in: English / French / German / Spanish - Built-in time date generator • Auto delete • Alarm counter • Jog Shuttle • Forward / reverse field advance • Automatic summer time adjustment • Lifetime counter • Through output of video • Position adjustable camera titles (10-character) • One push adjustable clock - Push-lock terminals for easy installation

## Optional accessories (sold separately)

## Disc Writer

## VA-EXD1 W

Backup important data on $\mathrm{CD}+\mathrm{R} / \mathrm{RW}$ discs with the USB connection.

| Physical | Dimensions | $420(\mathrm{~W}) \times 96(\mathrm{H}) \times 365(\mathrm{D}) \mathrm{mm}[16.54(\mathrm{~W}) \times 3.78(\mathrm{H}) \times 14.37(\mathrm{D}) \mathrm{in}]$ |  |
|  | Weight | 6.3 kg [13.9 lbs.] (with one HDD unit) |  |

Warnings regarding HDDs

- Do not attempt to instal lor replace a HDD on your own. You cannot use these HDDs on PCS.
- The unit may be damaged ift it is exposed to an impact or vibration, or the power plug is discoonnected during operation.
- Sanyo will not be held liable for any data loss due to an HDD error or a failure during recording

6ch Digital Video Recorder DSR-3706PA

Made in
Japan

An All New 6-ch Model Now Available in SANYO's Popular DVR Series
The Best Choice for Smaller Applications
High picture quality, long recording time,
max. capacity of 1 TB, and networking capability.

Built-in 6-channel Multiplexer
Up to six cameras can be connected.
Supports up to 1TB HDD per one bay
The unit has two HDD bays.

## *Mirror Recording

DSR-3706PA each comes with two HDD bays. With two HDD's of the same capacity installed, it is possible to record the same video on two HDDs, thus allowing for a backup.
Simultaneous Recording and Playback at 50 IPS
( $720 \times 288$ pixels)
SANYO's exclusive digital technology allows recording and playback at the same time at 50 IPS (maximum). Smooth images can be reproduced and every incident in the monitored areas is successfully recorded.

## One Touch Multi-Channel Copy

Multiple channels can be copied to various media with a single operation. Use the camera select buttons on the front panel to select desired cameras and start recording. Pressing the MULTI button will select all cameras simultaneously.

Multi-screen Display for Network PCs The DVR Viewer2 software allows the user to select from full-screen, Quad, Multi9, and Multi-16 displays on any PC on the network. The DVR Viewer2 software is automatically downloaded by copying an image. It is also available for download on our website.

## AV Output Terminal on the Front Panel

## Network Features

Can be operated on the PC by installing a CCTV system Management Software VA-SW5000.

- Duplex Recording with 1-Image Switching $\bullet$ Video loss alarm
- Two-level password security lock (admin / user) • 30-day memory backup • Resume function • Disk full alarm • On-screen mode setting, menu languages built in: English / French / German / Spanish - Built-in time date generator • Plus display • Timer recording • Alarm counter • Auto delete - Automatic summer time adjustment • Lifetime counter • Buzzer • Position adjustable camera titles (10-character) - One push adjustable clock • Print Directly from a CF Card or a Microdrive

Optional accessories (sold separately)
Disc Writer

## VA-EXD1 W

Backup important data on $\mathrm{CD}+\mathrm{R} / \mathrm{RW}$ discs with the USB connection.

1ch Digital Video Recorder DSR-300P

| $\begin{array}{l}\text { Made in } \\ \text { Japan }\end{array}$ |
| :--- |

The simple, easy-to-use design of this digital recorder incorporates advanced features into its compact half-rack design that make it ideal for tight spaces.
Superior horizontal resolution of 520 TV lines with simultaneous recording and playback at 50 IPS ( $720 \times 288,720 \times 576$ pixels)
DSR-300P uses the Motion JPEG format for high-quality image recording and playback.

## Removable HDD*1

Removable front tray makes it easy to remove and store HDDs for convenient storage. HDDs with a capacity of 80,160 , and 300 GB or 500 GB are available. For added security, the case design includes a lock, meaning that HDD removal requires the use of a special key. The Hard Disk Tray*2 (VA-DT300) is available for ease of installation and storage. For further details about HDDs, contact the place of purchase.
${ }^{* 1}$ HDDs are sold separately
${ }^{* 2}$ One Hard Disk Tray VA-DT300 is included.

## Compact Size of 210 mm Width

The DSR-300P incorporates advanced digital functions into a compact design that allows it to be used in locations with limited space.

## Multiplexer Connectivity

The DSR-300P can be easily connected to multiplexer, making it easy to integrate into an existing VCR-based system. In addition, the optional VZU-COM300 communication board can be installed to allow the separately sold VSP-9000 System Controller to control a multiplexer.

## Print Directly from a CF Card or a Microdrive

 By using SANYO digital photo printer DVP-P1, it is possible to print images directly from a CF card or a Microdrive. SANYO does not assume responsibility when other printers are used.

CompactFlash (commercial product) *Up to 2GB supported.

RS-232C / RS-485 / Network Connections Supported with an Optional Board
A 10BASE-T / 100BASE-TX LAN connection allows the user to operate the unit from a PC. It is also possible to use SSP
(SANYO Security Serial Protocol) on a terminal with RS-485 or RS-232C ports.

## Removable HDD Viewer Software VA-SW300

This software allows the user to playback audio and video recorded on a removable HDD by inserting the HDD into an exclusive slot connected to the PC.

* Supports Windows® 2000 and Windows® XP

4ch Digital Video Recorder DSR-M814PA

Made in
Japan

Digital capability allowing quick retrieval and easy handling. Features more than two-weeks non-stop realtime recording with outstanding picture quality and audio. Supports networking, as well.

## Solid Capabilities in Compact Appearance

DSR-M814PA / DSR-M810PA has a compact body, suitable for small supermarkets and fast food franchises. Its digital recording enables outstanding picture quality and clear sound. In addition, its more than 1400 hours*1 nonstop recording comes with high-definition picture quality, and user can survey live video images and remote-control the device via a network*2.
${ }^{* 1}$ With a 500GB HDD unit at STANDARD picture quality
*2 With the packaged VA-SW8000LITE or the VA-SW8000, sold separately
Playback and Image Retrieval while Video Recording DSR-M814PA and DSR-M810PA allow more than 1400 hours of "real-time video" recording in the standard mode, with $720 \times$ 576 pixels and $352 \times 576$ pixels, respectively. Furthermore recorded images can be played back simultaneously and impeccable surveillance is possible even while retrieving and playing back desired video images.

## Supports up to 1TB HDD per one bay

The unit has two HDD bays, each supporting up to 1TB*3 HDD to make the unit the right choice in today's trend for bigger drives. Select a secondary drive that suits the needs among the optional drives. Selecting a drive of the same capacity will allow the use of the mirroring*4 function for data backup.
For the latest available range of optional drives, contact the place of purchase.
*3 Support for all HDD units introduced in the future can not be guaranteed
*4 Mirror Recording
DSR-M814PA / DSR-M810PA each comes with two HDD bays. With two HDD's of the same capacity installed, it is possible to record the same video on two HDDs, thus allowing for a backup.

## Automatic Switching of 4-screen / Full-screen Display

 DSR-M814PA is a "Quad" unit that allows 4-screen display on a single monitor. It also allows a full-screen, sequential display of each channel with automatic switching or a full-screen display of a desired channel.
## Built-in Motion Sensor *5

DSR-M814PA comes with a built-in motion sensor. Different settings can be made for each channel image independently. The sensor can detect moving objects within the screen by picking up changes in brightness. The user can use this feature to trigger an alarm recording.
*5 available only with the DSR-M814PA

## Compact Size of 210 mm Width

Digital recording is now available in a compact package of 210 mm in width, which makes it possible to install two DSR-M814PA units side-by-side in an EIA19" rack. It is an ideal solution for the limited spaces of convenience stores, or casinos where a large number of DVRs are needed.

A Variety of Recording Modes
These recorders offer a variety of recording options: Normal Recording for the image being monitored; Timer Recording with a pre-set time; Motion Sensor*5 for when a moving object is detected on-screen; Alarm Recording after an external alarm input; combination of Timer/Alarm Recording; and combination of Motion Sensor and Alarm Recording.
${ }^{* 5}$ available only with the DSR-M814PA

## Various Playback Functions

DSR-M814PA / DSR-M810PA features 6 playback functions: Playback, Still, Cue / Review (2x to 180x), Frame advance, Slow motion ( $1 / 8$ to $1 / 2$, forward and backward), and Search.

## Search Functions

The two search functions - "Alarm Search" and "Time / Date Search" - call up desired images instantly.

## Security Lock

There are two levels of security lock - Administrators and Users. - offering users the best option for their security needs.

## TV-System Switching between PAL / NTSC

A changeover switch in the back can transfer video signals of surveillance camera input / monitor output to PAL or NTSC format. (Note: this switch only routes the video signal to an appropriate circuit and does not mean that the unit converts a NTSC input to PAL format, or vice versa.) The AC power source is for 120 to 240 V .
*This TV-system switching should be selected to PAL or NTSC before it is plugged in the power source.

## Built-in USB Terminal

The USB terminal on the front panel gives easy access for backing up data onto a CD-R/RW or a CompactFlash card*6. Downloading and uploading of setup menus by use of a CF card offer an easy option for setting up additional
DSR-M814PA / DSR-M810PA recorders.
${ }^{* 6}$ For a validated CF reader, and CD-R/RW consult www.sanyosecurity.com.

## Built-in Control Terminals

These terminals make it possible to control the
DSR-M814PA / DSR-M810PA using a Resistive ladder remote controller.

## Series Recording

Multiple DSR-M814PA / DSR-M810PA recorders can be connected in a series for vastly increased recording capacity, allowing extended recording at high resolutions and easy storage of recordings.

## Built-in RS-485 Terminals

The unit has built-in RS-485 terminals for SSP (SANYO
Security Serial Protocol) usage. Separately sold system controller VSP-9000 can control up to 128 units of DSR-M814PA / DSR-M810PA.

## Also Comes with a LAN Terminal

There is a built-in 100BASE-TX LAN terminal, allowing remote surveillance / control from PC via LAN with the DVR Utility Software.

DVR Utility Software for DSR-M814PA and DSR-M810PA VA-SW8000LITE software is included in the product package. By installing this software on a PC, it is possible to connect the PC and DVRs over a LAN and monitor live video or control DVRs on the PC.

## System environment

| Computer | IBM PC / AT or Compatible |
| :--- | :--- |
| OS | Windows ${ }^{\circledR}$ XP Professional SP2 |
| CPU*1 $^{\text {Pentium }}$ ® $4,3 \mathrm{GHz}$ or higher |  |
| Memory | 512 MB or more |
| Interface | 100BASE- TX, USB(1.1) |
| Display | XGA (1,024 768 pixel), 16-million color or higher*1 |
|  | AGP graphics card with hardware overlay support <br> or PCI Express graphics card*2 <br> <Recommended graphics chip> <br> ATI : RADEON9000 series or higher <br> nVidia : Geforce4 series or higher, Quadro4 series or higher <br> Matrox: MillenniumP 4 series or higher |
| Sound | Sound card with 48kHz stereo playback support <br> (PCI connection recommended)*3 |

*1 When using the software at a resolution of $1024 \times 768$ pixels, open Windows Task bar Properties dialog box and select the "Auto hide" check box.
*2 Requires the latest Direct $X^{\circledR} 9$.0c compatible driver.
*3 A sound card is required to the sound part in live or played back video

A high-end software package VA-SW8000 is also available (sold separately)

High-end software package
DVR Utility Software
VA-SW8000 (sold separately)

By installing VA-SW8000 in a PC, the user can build a remote surveillance system that links DVRs and the PC via a LAN. In addition to setting up each recorder, recording, retrieval, playback and live surveillance options are available. Moreover, up to 4000 DVRs in a network can be controlled by the PC. Complete security is provided by ID-password protection with four levels of accessibility. In addition, the software features a function that verifies the authenticity of data by detecting any alteration made to recorded images.

- Buzzer
- Video loss alarm
- 30-day memory backup
- Resume function
- Disk full alarm
- On-screen mode setting, menu languages built in: English / French / German / Spanish
- Built-in time date generator
- Clock adjustment
- Alarm counter
- Alarm search
- Auto delete
- Time / Date search
- Forward / reverse frame advance
- Automatic summer time adjustment
- Lifetime counter
- Through output of video
- Push-lock terminals for easy installation

# 16-4ch Monitoring with Quality Picture of MPEG-4 and Full Motion Picture of 200 IPS* 

*Only DSR-2016

## MPEG-4 Enables Speedy and Glitch-Free Monitoring over a Network

## MPEG-4

The MPEG (Moving Picture Experts Group) 4 standard was designed to reproduce a wide range of moving pictures from those on a low speed communication line to those with high-definition TV picture quality. It is especially effective for application on low speed networks. While conventional MPEG1/2 encodes only portions of the picture that have changed from the key frames, MPEG-4 employs a new technique to disassemble a frame into objects. Simply put, it disassembles a picture into elements such as backgrounds, persons, buildings, etc. and records differentials or each object. The method is similar to that of M-JPEG recording format and things that can be handled as MPEG-4 objects are not limited to of physical nature, but include audio as well.

## Low Rate but High Quality

Since MPEG-4 offers quality pictures at a low bit-rate, it is possible to record pictures for a considerably longer time compared to JPEG.

## Network

DSR-2016 / DSR-2004 offers network connectivity with LAN and WAN. MPEG is an international standard for highly efficient digital encoding (compression) of video and audio signal and is indispensable for video signal compression and transmission over a network. Compared to conventional systems, DSR-2016 / DSR-2004 offers improved surveillance video transmission - clear pictures at low bitrate - by the adoption of MPEG-4.

Simultaneous Recording/Playback at 200 IPS (DSR-2016) The DSR-2016 offers the capability to smoothly record and playback movement at a maximum rate of 200IPS. It also features two HDD bays, enabling expansion of storage capacity up to 1 TB .

Simultaneous Recording and Playback
The simultaneous recording and playback function makes it possible for the user to review recorded images without interrupting the recording in progress (in the CIF mode, $360 \times 240$ pixels).

Triplex Function
The Triplex function of DSR-2016 / DSR-2004 makes it possible to perform three functions simultaneously, i.e. recording, playback, and network monitoring.

Built-in Motion Sensor
DSR-2016 / DSR-2004 comes with a built-in motion sensor. Different settings can be made for each channel image independently. The sensor can detect moving objects within the screen by picking up changes in brightness. The user can use this feature to trigger an alarm recording.

Audio Recording Available
The unit comes with 4ch input and 1ch output terminals to enable audio recording of each channel.

Two-way Audio over a Network
During a remote surveillance, it is possible not only to receive audio, but also to send a warning message to the point of surveillance.

## 4ch MPEG-4 Digital Video Recorder

 DSR-2004

Standard Configuration Includes a CD-R/RW Drive (DSR-2016)
The DSR-2016 comes with a CD-R/RW drive and does not require additional devices for backing up images and settings.

Auto-recording with Optimum File Size
DSR-2016 / DSR-2004 automatically selects an optimum file size depending on the input signal to make recordings with the same picture quality. The recording time changes depending on the input signal.

## Network Connection

A variety of remote operations such as live image surveillance, main unit operation, etc. can be performed via a LAN or ADSL network connection.

## Easy Backup

Supports the use of USB memory sticks. This makes it easy to backup not only still images, but also videos in AVI format.

## Compact Size of 350 mm Width (DSR-2004)

Digital recording is now available in a compact package of 350 mm in width. It is an ideal solution for the limited spaces of convenience stores and retails chains, where a large number of DVRs are needed.

Search Functions
The three search functions - "Event Search", "Time / Date Search" and "Time line Search" - call up desired images instantly.

Security Lock
Security lock - offering users the best option for their security needs.

## IR Remote Control

The IR remote controller allows the user to control up to nine DVRs.

## Rear Connectors for Essential Needs

Though it's compact, the rear panel provides terminals for essential devices including a microphone and speakers.

## Others

- VGA out • Supports DDNS • LIVE capture

## DSR-2016 / DSR-2004 supports up to four concurrent Digital Client users

## DSR-2016

(Unit: mm)

## DSR-2004

# Save Space with LCD Monitors! The line-up with Crisp Pictures also Includes Color Monitors. 

## LCD flat pane!

Flat panel displays
These SXGA grade monitors display clear and crisp pictures. The thin package makes them the ideal choice for applications with limited space.

## Front switches

Easy to access front panel switches
Ease of operation is the focus of this design. The user can switch the display, set the volume, and set the scan from switches on the front panel.

## Matrix Switcher

MPX-MX2005

## High Density Scalable Matrix Switcher

SANYO's Matrix Switcher MX Series is a modular security system based on a microprocessor and supports up to 1,024 inputs and up to 96 outputs with a single matrix system. A large number of video inputs $(10,000)$ and outputs $(1,000)$ can be controlled from a single controller.

## General

The modular design of the Matrix Switcher makes it easy to expand the system to a maximum of 16 cards.
Both $4 \cup$ and $8 U$ rack-mount housing is available for the switcher with a single 4 U bay holding 112 video inputs and 16 outputs.

## Modular Construction

The Matrix Switcher is easily expanded using slots for expansion modules. The housing holds up to 16 cards.

## Multi-Protocol Support (SSP-Compatible)

The Matrix Switcher is controllable from SANYO VSP-9000 or any other SSP-compatible control device. By using the new Touch Panel Controller with user-friendly graphical user interface, the user can easily control and set up the Matrix Switcher. At the same time, the controller can be used to control other devices supporting SSP protocol, such as SANYO dome cameras, multiplexers, DVRs and VCRs. Integration of other devices can be also achieved by the use of an optional SSP receiver.

## Control

Use one of the following options to control the Matrix Switcher.

1. VSP-9000 controller or any other SSP-compatible controller
2. Any PC on the same network as the matrix via a TCP/IP connection. The control software is included in the package.
3. Using the optional custom-made software with a graphical map interface. This software needs to be installed in a PC, from which control is performed through a TCP/IP connection.

Network Support and LAN
The Matrix Switcher can be controlled by using a TCP/IP connection, either Camera from a touch panel controller or a PC

Speed Dome Camera and existing networks.

## Timer Functions

It is possible to program over 100 camera and monitor tours individually.

## Alarm Management

With an optional order, the system comes with an external alarm input for each camera and an external alarm output for each monitor. Each alarm signal can be configured to call any camera to any monitor, to put a dome camera to any preset position, or to start tours or sequences.

## MPX-MX2005

[Unit: mm (inch)]

| MODEL | MPX-MX2005 |
| :---: | :---: |
| Video format | PAL / NTSC |
| Input signal / Input impedance | $1.0 \mathrm{Vp-p/75} \mathrm{\Omega}$ |
| Output signal / Output impedance | $1.0 \mathrm{Vp}-\mathrm{p} / 75 \Omega$ |
| Video input | 64 (up to 1,024 [BNC]) |
| Video output | 16 (up to 96 [BNC]) |
| Alarm input | 16 (up to DI-1024) |
| Alarm output | 8 (up to DO-512) |
| Communication | RS-232C, RS-485, USB, Ethernet |
| Communication speed | 19,200bps |
| PTZ camera control | $3 \times \mathrm{RS}-485$ |
| On screen display | Date. time, video number, video title, monitor status |
| Text insertion | Each up to 20 characters |
| Dimension | $482(\mathrm{~W}) \times 378(\mathrm{H}) \times 172$ (D) $\mathrm{mm}[19.0(\mathrm{~W}) \times 14.9(\mathrm{H}) \times 6.8(\mathrm{D}) \mathrm{in}$. |
| Power requirements / Frequency | 100 V to $240 \mathrm{VAC} \pm 10 \%, 50 / 60 \mathrm{~Hz}$ |

Option

## Security System Solutions

## Monitor Plus

Connect shops and branch offices with a network for better management. The DSR-HB8000 can manage up to 80 cameras via a Monitor Plus network.

## A Network Built Around a Hybrid DVR Provides an Optimum Solution for Remote Surveillance

In addition to normal surveillance and recording operations, including extensive video recording with state-of-the-art MPEG-4 technology, the Hybrid DVR offers added features, such as building databases inter-connected with tenants POS systems or ATM* systems. The use of MPEG-4 improves the quality of remote surveillance over a network and expands the scope of applications.

## Security System Solutions

## Network

Exchange information over a network with retail shops and franchise shops.

## Remote Surveillance System with Network Cameras

A remote surveillance system can be built simply by using network cameras and installing viewing software on a PC that has a network connection. Optional use of VA-SW3050 software enables the user to make recordings as well, enhancing the system to the level of one with an exclusive recorder installed.

## Security System Solutions

## Large-scale

 Retail FacilitiesSurveillance systems for department stores, shopping centers, home appliance and DIY outlets, and other premises with expansive sales floors

## Creating a Pleasant and Safe Shopping Environment for Your Customers

Superstores and other large retail establishments are bustling centers of local activity where people from all walks of life gather to shop. For security systems that offer everyone from small children to seniors a pleasant and safe shopping experience, SANYO is the name you can rely on for sure-fire solutions that can even aid in accident prevention, staff training and merchandise management.

Systemeonfiguration

## Security System Solutions

## Hotel, Residential,

 Factory and Manufecturing FacilitiesSurveillance systems suited to hotels, holiday resorts, condominiums, housing complexes manufacturing plants, distribution centers, warehouses, research laboratories, offices and related facilities

## Prevention of vandalism and intrusion by outsiders with 24/7 systems for the protection of secure, comfortable living

For hotels and factories, where people, cars and objects come in and out frequently and round the clock, a reliable surveillance system is needed to create a safe and untroubled environment. Even for such a broad area, the SANYO digital surveillance system establishes a highly efficient crime-prevention and product management system with its superior data management and operationality.

## Security System Solutions

## Medium-scale Financial, Medical and Public Facilitifes

Surveillance systems suited to banks, securities firms and other premises, such as hospitals, post offices, museums, art galleries, theaters, cinemas and casinos

Monitor
ontroller

## Surveillance systems targeting dependable frameworks for crime and disaster prevention, in response to customer needs for assurance and peace of mind

Crime and disaster prevention and high levels of security are required at banks, stockbrokerages and other financial institutions that handle big-ticket financial products. Introducing reliable surveillance systems that balance dependable, high-quality data management and smooth operability that won't detract from
smooth operability that won't detract
the atmosphere on premises.

## Security System Solutions

## Small-scale Retail Facillites

Surveillance systems suited to relatively small-scale retail facilities, including convenience stores and corner shops, drugstore, fast-food restaurants, bookstores, rental chains and specialty shops, such as boutiques, watch sellers, and jewelers

## Simple surveillance systems for high-visibility, without the Need for Technical Staff

Large numbers of people stop by convenience stores and other small retail premises to do their shopping. If a limited number of staff is to handle crime prevention and inventory under such circumstances, the use of a high-quality security system is essential. SANYO's digital surveillance system lineup provides the solution with excellence in picture quality, maintainability, operability and reliability.
